Good Good performance on safeguarding, indicating effective turn around of child protection plans to minimise risk.	2007/08	3.2 (3 of 94)		
	ECS Andy Sedgwick	NI 65 Children becoming the subject of a Child Protection Plan for a second or subsequent time	2009/10 Q1 2009/10 Q2 2009/10 Q3	11.2% (19 of 170) 9.8% (16 of 174) 12.1% (20 of 16)				Fine	2008/09	12.5 (22 of 176)		13.7	12.8	Inline	Inline	Low Good performance is generally low. One conference involving 3 children and young people missed the statutory timescales.	2008/09	100.0		99.1	98.4			High A higher value indicates better performance. However, the indicator should be considered in conjunction with NI 65 and NI 64. For example, a high figure for this indicator would also be expected to be linked with reasonably low figures for NI 64, otherwise the efficacy of the reviews may be questionable. The best performance on this indicator would be 100%.	Improved - Back to 100%	2007/08	95		
	ECS Andy Sedgwick	NI 61 Stability of looked after children adopted following an agency decision that the child should be placed for adoption	2009/10	90% (9 of 10)				Good	2008/09	76.9		65.4	74.6	Inline	Inline	High Good performance is typified by higher percentages. 	ECS Andy Sedgwick	NI 62 Stability of placements of looked after children: number of moves	2009/10 Q1 2009/10 Q2 2009/10 Q3 Overall 2009/10	11.7% (16 of 137) 13.2% (19 of 144) 9.2% (14 of 152) 15.4% (27 of 174)				Concerns The lower the percentage for this indicator, generally the better the performance is considered to be. Slough just managed to stay in the 'best practice 5 blob' zone (cut off for this indicator is 16%). This is the highest number of LAC we have had that have experienced 3 or moves in the year. The % this will need to be monitored closely in 2010-11.	2008/09	8.8 (12 of 137)		10.1	10.4	Inline	Inline	Low The bandings described performance as: 0 < 16.01: Very Good 16.01 < 20: Ask questions about performance 20 <= 100: Investigate urgently	Very Good Maintained at best performance level	2007/08	7.5		
	ECS Andy Sedgwick	NI 63 Stability of placements of looked after children: length of placement	2009/10 Q1 2009/10 Q2 2009/10 Q3 Overall 2009/10	66.7% 67.9% 60.7% 55.2% (16 of 29)				Concerns Lowest performance against this indicator for Slough. Although best practice has not really been established for this indicator the last published comparator figures were SN = 67% and Eng = 67%. Slough's figure may end up being significantly below this years comparator figures. Poor outcome on long term stability could suggest: insufficient support to young people and/or foster carers; insufficient range and number of placements; too many placements 'over numbers'; lack of placement planning around permanence; lack of available long-term foster carers; difficulties in retaining foster carers.	2008/09	62.5		67.7	66.4	Inline	Inline	High Generally high, although performance should never reach 100% - some placement change is necessary. It should be noted that the banding of this indicator describes the best performance as 95 <= 100, and the worst (Investigate Urgently) as 0 <= 80.	Slight fall from last years performance	2007/08	98.0		
3. Enjoying and Achieving	LAA	ECS Bob Garnett	NI 72 Achievement of at least 78 points across the Early Years Foundation Stage with at least 6 in each of the scales in Personal Social and Emotional Development and Communication, Language and Literacy	2008/09	46.3	53.0	49.4	51.2	Improved Considerable improvements on 2008.
